REPORT OF A PROPOSED SANITARY LANDFILL  
SITE FOR THE TOWN OF HALLIE, CHIPPEWA COUNTY

There is submitted herewith a report on a proposed sanitary landfill site to be used by the Town of Hallie, Chippewa County.

GENERAL INFORMATION

Owner (On Option): Town of Hallie, Chippewa County

Type of Disposal Operation: Sanitary Landfill

Location: SE $\frac{1}{4}$ , SW $\frac{1}{4}$ , Section 28, T28N, R9W, in the Town of Hallie, Chippewa County

Responsible Official: Charles F. Alexander, Town of Hallie Chairman

Area Served: Town of Hallie

Population Served: 4312 permanent

License Number: 1771 - Sanitary Landfill

CONDITIONS FOUND

On March 31, 1972, in the company of Ernest Ewings, Jerome M. Smetana, and Zealous Joles, representatives from the Town of Hallie, the writer made an investigation of a proposed sanitary landfill site to be used by the Town of Hallie. The inspection was made to check for locational requirements (NR 151.09) of the Wisconsin Solid Waste Disposal Standards.

The following items were noted:

1. The proposed site consists of 40 acres.
2. The proposed site is adjacent to property used as an airport by the City of Eau Claire.
3. The nearest residences are located  $\frac{1}{4}$  mile west of the area.

4. The residences are screened from the proposed area by an earthen ridge and an area of open woods.
5. The nearest surface water is the Chippewa River which is located over  $3/4$  of a mile to the north and approximately  $3/4$  of a mile west.
6. The proposed area is flat and the soil appears to be sandy with gravel underlying parts of the area (a gravel pit is located north of the site).
7. There are no buildings on the site and the area is not fenced.
8. Although the site is adjacent to the City of Eau Claire airport, no active runways are in flight line with the proposed area.
9. The site meets all the site location requirements (NR 151.09) of the Standards.

#### DISCUSSION

The Town of Hallie is now operating a sanitary landfill in a site which has been filled to capacity. They have been using emergency measures to prolong the use of their site until they could find a suitable site to relocate in.

The proposed site which was inspected on March 31, offers the Town of Hallie an area which can be worked efficiently. The flat parcel offers no land barriers (other than working in sand), no potential water hazards, and can be activated with little outlay of operational costs. A black top road services the site.

The Town of Hallie must apply for a Special Land Use Permit from the Chippewa County Zoning Administrator since the Town is under the jurisdiction of Chippewa County Sanitary Laws.

The Town of Hallie must submit plat plans and proposed method of operation to the department for approval prior to licensing.

Application for licensing of the new operation must be made at least 30 days prior to the desired effective date.
